Quality Policy

ABS Friction strives to be the best friction provider in the industry. To support that goal, ABS has established, and is committed to ensure all regulatory, safety and customer requirements are met. Through close cooperation with our staff, our customers and our suppliers, ABS is committed to the continual improvement of our product, our processes and our quality management system

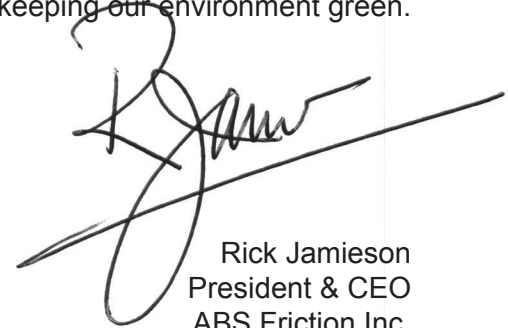

Environment, Health & Safety Policy

As an automotive parts manufacturer and distributor, ABS Friction Inc. is dedicated to conducting our operations in a manner that minimizes our effect on the environment wherever practicable, while focusing on maximizing a safe and healthy work environment for our employees.

With "Safety 1st" and "We Love Green" as our core commitments, we encourage employee participation to identify and control hazards before they can cause harm to our environment or our personnel.

With employee involvement, we can pursue our obligation to prevent pollution, comply with applicable environmental, health and safety legislation and regulations, or any other requirement we may adopt, in an effort to continuously improve our Environmental, Health and Safety performance.

Together we will strive to be an industry leader in making Safety 1st and keeping our environment green.

Rick Jamieson
President & CEO
ABS Friction Inc.
